## 'The Jewels of The Sea'

Over thirty large cast iron sculptures which are inspired by single cell organisms called Diatoms. Diatoms are a form of plankton and they form the basis of almost all the food chains in the oceans. The sculptures aim to symbolise the start of new life at the 'East Shore Village' where once stood the old 'Vane Tempest' coal mine.

The Jewels of the Sea Sculpture trail was commissioned by the Yuill, Miller, Haslam Consortia for the entrance site at the East Shore Village housing development in Seaham, County Durham, England.

s c u l p t o r

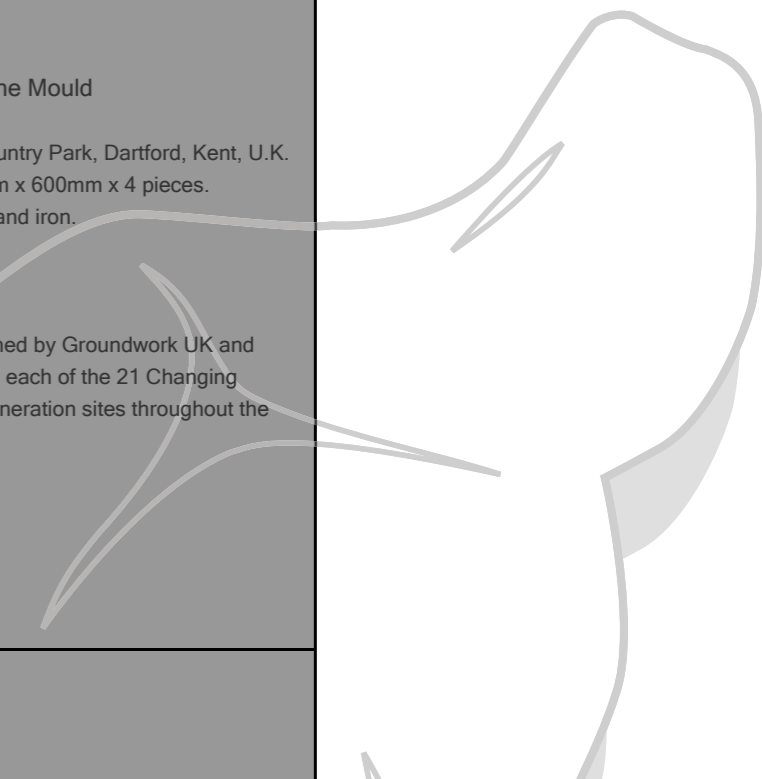

ANDREW McKEOWN specialises in public sculpture and has completed many large scale sculpture commissions throughout the U.K. for housing developers, local councils and environmental agencies such as Groundwork UK and Yuill, Miller and Haslam Homes.

Breaking the Mould

Darenth Country Park, Dartford, Kent, U.K.  
2m x 600mm x 600mm x 4 pieces.  
Cast stone and iron.  
1 of 21.  
2000

Commissioned by Groundwork UK and repeated on each of the 21 Changing Places regeneration sites throughout the U.K.

Andrew's sculptures are often inspired by themes of growth, change and renewal and his sculptures are cast or fabricated in durable materials such as iron, steel, bronze and stone.

Organism

Saltburn by the Sea, Cleveland, U.K.  
210cm x 120cm  
Steel with Bronze Patina  
2007

Andrew is available for public commissions, residencies and exhibitions across the U.K. and internationally.
